

CYBER3Rapid Risk Review

Based on cyber security standards and best-practice, CYBER3 is a new and comprehensive approach to helping insured clients determine, understand and prioritise practical improvements in cyber risk reduction

CYBER3 delivers a practical checklist for improvement

STORM - Strategic, Tactical & Operational Risk Management - STORM - Strategic, Tactical & Operational Risk Management - STORM

Our services enable our clients to benefit from our extensive experience to form practical improvement plans in risk reduction

Key results from **CYBER3** include:

- Cyber Risk Indicators
 - A dashboard-style presentation of key cyber risk indicators with scoring explanation.
- Cyber Risk Management Maturity Score
 - A practical rating on organisational risk management maturity across 5 key areas.
- 10-Point Cyber Improvements Checklist
 - Recommendations distilled into a list of actions resulting in stepped improvements in maturity.

 Objective and evidenced commentary on key risks and advice on addressing them. The three steps to **CYBER3** success:

- 1. Arrange Client Engagement
 - this can be either a telcon or more ideally a web conference. Optional pre-call document share.
- 2. STORM Assessor performs Review
 - Our specialist walks the client through each question with full clarification and support.
- CYBER3 Report Delivered
 - Jargon-less report with opinion statement and improvement action plan; ranked by criticality.
- Efficient and empathetic approach
 - Every client's operations and risks are different.
 Our assessment process is considerate of the challenges and specific cyber threats to which insured clients are exposed.

Our experts in both cyber risk and cyber incident response will bring their many years of experience and innovation to assist clients in their understanding of cyber risk in the context of their business challenges. We will also assist your clients to manage their risk effectively and ensure that losses from breaches are minimised.
